

# Fetal Bovine Serum

## Optimal performance and support

Fetal Bovine Serum (FBS) is the most commonly used serum for cell-based applications which are an integral part of cell culture, vaccine development, and drug discovery as it provides the most nutrients for the widest range of cell types. FBS provides critical growth factors for optimal performance of cell cultures and cell growth.

Captivate Bio has teamed up with Biowest, a leader in the collection of animal sera, to distribute FBS to the scientific community.

-  Enables Healthy Cell Growth
-  US and USDA Origins
-  Competitive Pricing
-  High Quality Serum
